

HOW TO

ROLL UP FAIR

STEP | 1

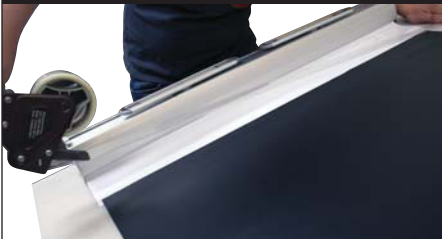

Locate the adhesive strip on the leader paper. Align the bottom of the banner to the leader paper of the banner stand base.

STEP | 2

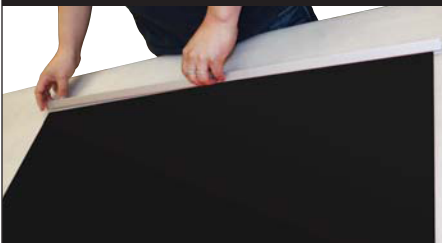

Remove the protective film of the adhesive tape. Making sure the banner is in perfect alignment, attach the REAR side of the banner bottom bleed to the exposed adhesive strip on the leader paper.

STEP | 3

Apply additional adhesive tape to the front of the connecting point between the banner and the leader paper as shown for reinforcement. This prevents adhesion loss between the banner and the leader paper, as any loss of adhesion would result in the loss of the tension.

STEP | 4

Slide the top of the banner into the profile bar and snap close to secure the banner to the profile bar.

STEP | 5

Secure the banner stand and hold the banner attached to the leader paper firmly. Then pull out the lock pin (Allen key wrench) to activate the spring tension. Gently release and guide the banner as it rolls into the banner stand base.
